

Region III works with VADEQ to Foster Redevelopment - On December 8, 2006, USEPA Region III issued a Final Decision of Corrective Action Complete Without Controls for the former Colonial Marble Products facility. Located in Petersburg, VA, the facility manufactured cultured marble from 1985 to 1997. EPA and VADEQ worked together in expediting the corrective action determination to facilitate reuse of the closed facility. The Virginia Department of Environmental Quality had previously issued a Notice of Clean Closure on November 9, 2000. Old Mansion Foods, Inc. plans to purchase and redevelop the property. (W.
